

## EaseUS Finally UnCOVERS New Data Recovery Wizard 10.0

EaseUS has officially unveiled the long awaited Data Recovery Wizard 10.0, which speeds up whole data scanning process through adjustment on RAW recovery algorithm. With Swedish and Danish supported in this version, newly added file labels render users exactly specify target files to recover in a flash alongside.

What makes EaseUS [data recovery software](#) version 10.0 a highlight is the RAW recovery mode that has great effects on data scanning including the speed and restoring results to much extent. When a file system of hard drive partitions is damaged or corrupted, the hard disk becomes RAW that makes it unreadable to the operating system and any data cannot be written into. Thereafter, the partition does not contain a recognized file system.

Some common error messages may appear then whether it's necessary to format the hard disk. In a case study, possible causes for a hard drive to become RAW are destroy on file system structure, partition table damage, OS failure, intrinsic problems on hard drive and virus attack. Right now with the drive being in the raw state there is no access to the original data stored on that partition which is susceptible to such situation. Whatever the cause, it's very pressing to return the file system back to its original form against any severe data loss disasters.

EaseUS RAW recovery can simply get all lost data back to its original state by fixing the RAW file system in the progress without fear that it may lead to further damage. It centers round file recovery efficiency and results in greater restoring success.

On the other hand, more file labels are added in the 10.0 edition that makes it remarkably easy to track down all lost files especially Office document, Word, Excel or PPT and extract accurately what to recover in a breeze. Thus, the entire file

recovery course gets much smoothly and clearly whatever users' skill level.

Making incessant moves on [data recovery from Windows](#) environment, EaseUS Data Recovery Wizard 10.0 continues to put restoring effectiveness at the first place for a hassle-free experience and heads into meeting broad users' needs on international market gradually with multi-language supported.
